

## **Intellectual Property Right (IPR) and Technology Transfer issues in Life Science research**

*Dr. Shirshendu Mukherjee  
Senior Strategic Advisor –India Initiative  
Wellcome Trust*

Life science research has gained substantial momentum in last decade with new inventions coming up in the field of healthcare and agriculture research. The inventions needs to be protected so that it creates a value and prevent misuse. Technology transfer plays a critical role in disseminating the IP created during the research programme.

IPR and technology transfer issues in Life Science research and also writing winning grant applications will be discussed during the presentation.
